

On Paul of Venice's Doctrine of Being in his Commentary on Aristotle's *Metaphysics*: '*Metaphysica V 7: diverse soluzioni esegetiche a confronto*', *Documenti e Studi sulla Tradizione Filosofica Medievale* , vol. XII, pp. 1-61, 2001

*Abstract*: I provide the first critical edition, with apparatus, of a chapter of Paul of Venice's *Commentary on Aristotle's Metaphysics* (late XIV century). The edition is accompanied by an essay in which I offer an interpretation of Paul of Venice's doctrine of being, and its relation to the Aristotelian categorial ontology.
